

GVERSE® FieldPlanner*

Optimize Your Production

GVERSE Field Planner offers powerful, quick & easy field planning capabilities that result in time and cost reductions, allowing field planners to create, save, analyze and manage multiple field plan scenarios to determine optimal hydro carbon production.

GVERSE Field Planner intelligently populates wells over an entire field based on defined hazards, lease areas, and constraints. It uses an advanced optimization algorithm to lay out hundreds of wells in minutes. It works with you by taking into account surface hazards, existing wells in the area, and lease boundaries to maximize lateral length in the zone. GVERSE Field Planner is flexible and allows you to make granular changes to well geometry, orientation, and location throughout the development of the field. GVERSE Field Planner is completely integrated within GeoGraphix.

Benefits

The GVERSE® FieldPlanner software offers you the following benefits:

- Overcome Geometry constraints; Designed to work on restricted areas, hilly areas or existing wells
- Automatically layout pad and wells all over the map, given certain constants
- Quickly create, save, and analyze multiple field plan scenarios

*Powered by
STI Technology

Disclaimer

- Analyze field plan scenarios to determine optimal hydrocarbon production
- Lower the economics costs

Key Features

- Avoid no-go zones – Existing wells, rivers, buildings, and environmentally sensitive areas
- Surface Hazards – Terrain slope (DEM)
- Subsurface Hazards – Avoid areas with existing wells
- Lease Areas – Add tracts
- Easily edit setbacks
- Flexibility to add random polygons

Requirements

Software

The software that must be installed on the system running the software are as follows:

- GeoGraphix Discovery 2017.3
- LMKR License Management Tool 2016.1 for GVERSE Field Planner license.
- The LMKR License Management Tool (LMT) must be installed to configure the Field Planner license.
- MATLAB Runtime R2018a (9.4)
- Adobe Reader for selected help files (optional).

Operating System

To run the software, you need one of the following operating systems installed on your system:

- Windows® 7 Professional x64.
- Windows® 7 Enterprise x64.
- Windows® 7 Ultimate x64.
- Windows® 10 Professional x64.
- Windows® 10 Enterprise x64.

Note – It is recommend to use the latest Microsoft® service packs and security patches.

Hardware Requirements

- System: 8 GB (16+ GB recommended)
- Graphics Card: 2 GB (4 GB recommended)

Licenses

The following licenses are required to run the software:

- GeoGraphix Discovery license version 2017.1
- GVERSE Field Planner license version 2017.1
